## STUDENT SATISFACTION SURVEY REPORT

**Academic Session: 2015-16**

## **NOTE ON DATA & METHODOLOGY**

At the end of every academic session, all students are requested to fill up the scheduled form for assessing the college. Only Honors students are approached for assessing their teachers.

It is only optional for the students to provide their names and roll numbers in the forms, but the Honors students must mention their department.

In the forms, at every aspect, the students have to provide grade on a 5-point Likert Scale.

The scale in the form is presented as below:

- 1: Excellent
- 2: Good
- 3: Fair
- 4: Poor
- 5: Very Poor

Generally, only 5-10% of all the students enrolled in the college provide their feedback. In many cases, they do not respond to all the questions/aspects.

After collection of data, they are fed to software manually. The software provides the summaries in requested formats.

However, in order to interpret the gradation numbers as 'higher score means better', the numbers are then all subtracted from 6. As a result, in the reports, '5' means Excellent and '1' means Very Poor.

So, in the reported table, the higher the 'Average' the worse will be the grade of the college. But, in case of 'Reverse Average', the higher the number the better will be the grade of the college.

This SSS Report consists of only the overall assessment of the college, not of the individual teachers.
